

AJINKYA DESHMUKH

Software Developer

+91 9551008686 | ajinkyadeshmukh8686@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Pune, Maharashtra

SUMMARY

Software Developer specializing in backend architecture, system design, and full-stack web development. Highly skilled in TypeScript, Node.js, and modern cloud technologies like Docker and AWS. Demonstrated track record of building high-performance, data-intensive platforms—including smart intrusion detection systems and scalable community resources—with a broad technical toolkit that includes Python, machine learning, Spring Boot, and foundational mobile development capabilities.

TECHNICAL SKILLS

JavaScript | TypeScript | Python | C++ | React.js | Next.js | Node.js | Express.js | Spring Boot | FastAPI | PostgreSQL | Prisma ORM | Redis | BullMQ | Docker | AWS | Git | GitHub | REST APIs | System Design | Cloud Computing | Machine Learning | Flutter

EDUCATION

B-Tech | Computer Science & Artificial Intelligence | G H Raisoni College of Engineering & Management | CGPA: 9.65 2024 - 2028

PROFESSIONAL EXPERIENCE

SENIOR DEVELOPER INTERN | Blessin Care Essentials Pvt. Ltd. | Pune, Maharashtra June 2025 – December 2025

Led the end-to-end development and architectural planning for multiple production-grade applications. Actively shaped system flows and delivered scalable features for real-world client deployments.

- **Engineered** a MERN-stack Finance Tracker featuring automated recurring expense tracking via Cronjobs and dynamic data visualization, significantly reducing manual data entry.
- **Built** core functionalities for a social media platform, delivering robust user profiles, content posting pipelines, and engagement workflows.
- **Spearheaded** feature development for Living Hub, a hospitality management system, optimizing operational efficiency for hostels and rental properties.

PROJECTS

CampusMate — Student Community & Resource Platform | [Project Link](#) **2025 – Present**

A student-focused platform built collaboratively by a team of developers to simplify access to academic resources, campus updates, marketplaces, and student utilities. Serves 500+ active users and has reached over 1,000 students across participating campuses.

Tech Stack: React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, TanStack Query

- Contributed to the development of a platform including notes, campus marketplace, updates, and productivity tools.
- Built scalable dashboards, moderation workflows, and analytics systems for content management and platform operations.

SentinelX — Smart Intrusion Detection System | [Project Link](#) **June 2026**

Security analytics platform for large-scale log analysis & threat detection. Processes files up to **300 MB (~1.2 million log entries)**, and generates AI-powered threat intelligence reports.

Tech Stack: Node.js, Express.js, TypeScript, FastAPI, Python, PostgreSQL, Prisma ORM, Redis, BullMQ, Docker, React

- Architected a **4-stage resumable analysis pipeline** for processing large-scale security telemetry.
- Developed an asynchronous processing architecture using **Redis and BullMQ**, enabling retry handling, and scalable background analysis workflows.
- Generated AI-powered threat summaries and remediation recommendations from security findings.

Expenzo — Smart Finance & Expense Tracker | [Project Link](#) **May 2026**

Tech Stack: React, TypeScript, Supabase, PostgreSQL, Tailwind CSS

- Built an expense tracking system with recurring bills, loan, investment management and analytics dashboards.
- Generated financial reports and actionable insights to support better financial decision-making.

ACHIEVEMENTS

9.65 CGPA | 150+ LeetCode Problems Solved | Leading CampusMate Student Platform Development | Built SentinelX Smart Intrusion Detection System | Full-Stack Developer | Continuous Learning & Problem Solving
